From: Michael Voght

Subject: Individual progress report for 5/23/15 – 5/29/15

Work Completed:

All OPCODEs have been implemented. The project is currently running and working. Still needs to be tested (slight unit testing when implementing OPCODES to make sure they were working appropriately)

Problems:

Realized that our EA code did not consider the fact that there is a possibility of 2 EA addresses. This was fixed with a flag. Other than that most have been trivial issues that were fixed with some testing.

Work Scheduled:

MON: Stand-Up meeting (30 min) – talked about the goals for this week and concerns

TUE: Group Work (3 hours) – Talked about issues we were having individually with our assigned OPCODES, and were able to complete a few OPCODES

THURS: Group Work (3 hours) – Combined most of the OPCODES together for testing still missing a few, but are close to working.

FRI: Group Work (1 Hour) – Brought together the final opcodes and fixed a few bugs.

Self Evaluation:

The team has done a great job and has made a lot of Progress over the week. We have completed the project and will be working on testing it fully before the presentation on Thursday.
